That is an old awt solution, swing has กewer and Awt is old better apis and deprecated and swing is old Consider using but newer swing which than awt has much better performance øver old heavy-Swing/has weight awt newer and better apis than awt

Awt may be more useful than swing

Awt is more useful advised to use than swing

Well **swing** is richer in terms of out-of-the-box components than **awt**

Swing has more features than the awt components
